

Korea: Green Energy Technologies

 31

Informationsveranstaltung

Termin: 21.01.2019 - 25.01.2019

Ort: Seoul, Korea, Republik

[+ ZUM KALENDER HINZUFÜGEN](#)

EU Gateway | Business Avenues has its origins in the EU Gateway Programme which was created in 1990 to deepen economic interaction and cooperation between Europe and Japan. After more than 25 years of market presence, EU Gateway has become a leading business platform establishing successful partnerships between European and Asian firms in Japan, Korea, Singapore, Malaysia and Vietnam.

The third EU Gateway | Business Avenues mission to Korea focused on Green Energy Technologies will take place between 21 and 25 January 2019 in Seoul.

The EU-funded programme offers specialised coaching sessions and market intelligence to the selected European companies, promotes them on the Korean market, and facilitates the matchmaking process with potential business partners and clients. During the exhibition days, the companies have the opportunity to showcase their products and services in dedicated spaces. Ad-hoc and pre-scheduled business meetings are foreseen to take place during the whole week in order to maximise business opportunities.
